

NOTE
 THIS IS JUST A TYPICAL CAMERA WIRING DIAGRAM, THAT WILL WORK WITH THE SONY P-32 CAMERA. ALTHOUGH, IT MAY WORK WITH OTHER SONY P-SERIES OF CAMERAS, IT'S NOT GUARANTEED TO WORK.

6-PIN CONNECTOR – PHYSICAL CONNECTIONS

IMPORTANT!

1. EACH OUTPUT OF THE OPTICALLY ISOLATED OUTPUT RELAYS HAS AN ABSOLUTE MAXIMUM OF 150MA. CURRENT DRAW EXCEEDING THIS WILL DAMAGE THEM
2. THE OUTPUT RELAYS ARE NOT POLARITY SENSITIVE.

6-PIN CONNECTOR – SCHEMATIC VIEW

1. STRIP 24-28 GA WIRE AS SHOWN

2. PLACE WIRE INTO TERMINAL, ALLOWING THE INSULATION TO FILL THE BACK END OF THE TERMINAL.

3. CAREFULLY CRIMP THE TERMINAL TO THE WIRE AND INSULATION. FOR EXTRA HOLD, USE SOLDER.

CRIMPING THE PINS
